

Biological mechanisms are necessary to improve the robustness of species distribution models

Figures for manuscript and extended data

V. Van der Meersch et al.

Main

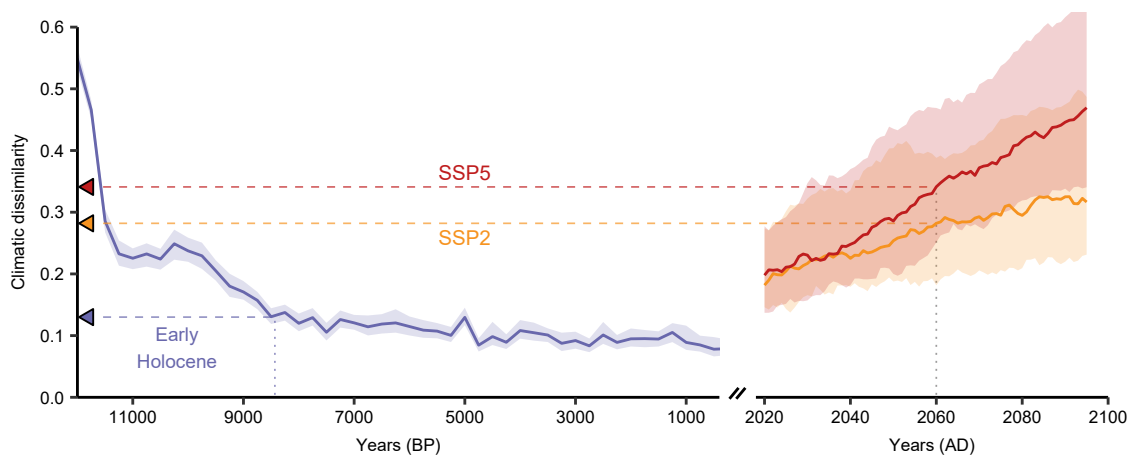

Figure 1: Evolution of climatic dissimilarity under past (12k-500 yr BP) and future (2005-2100) climate changes, relative to 1901-2000}.

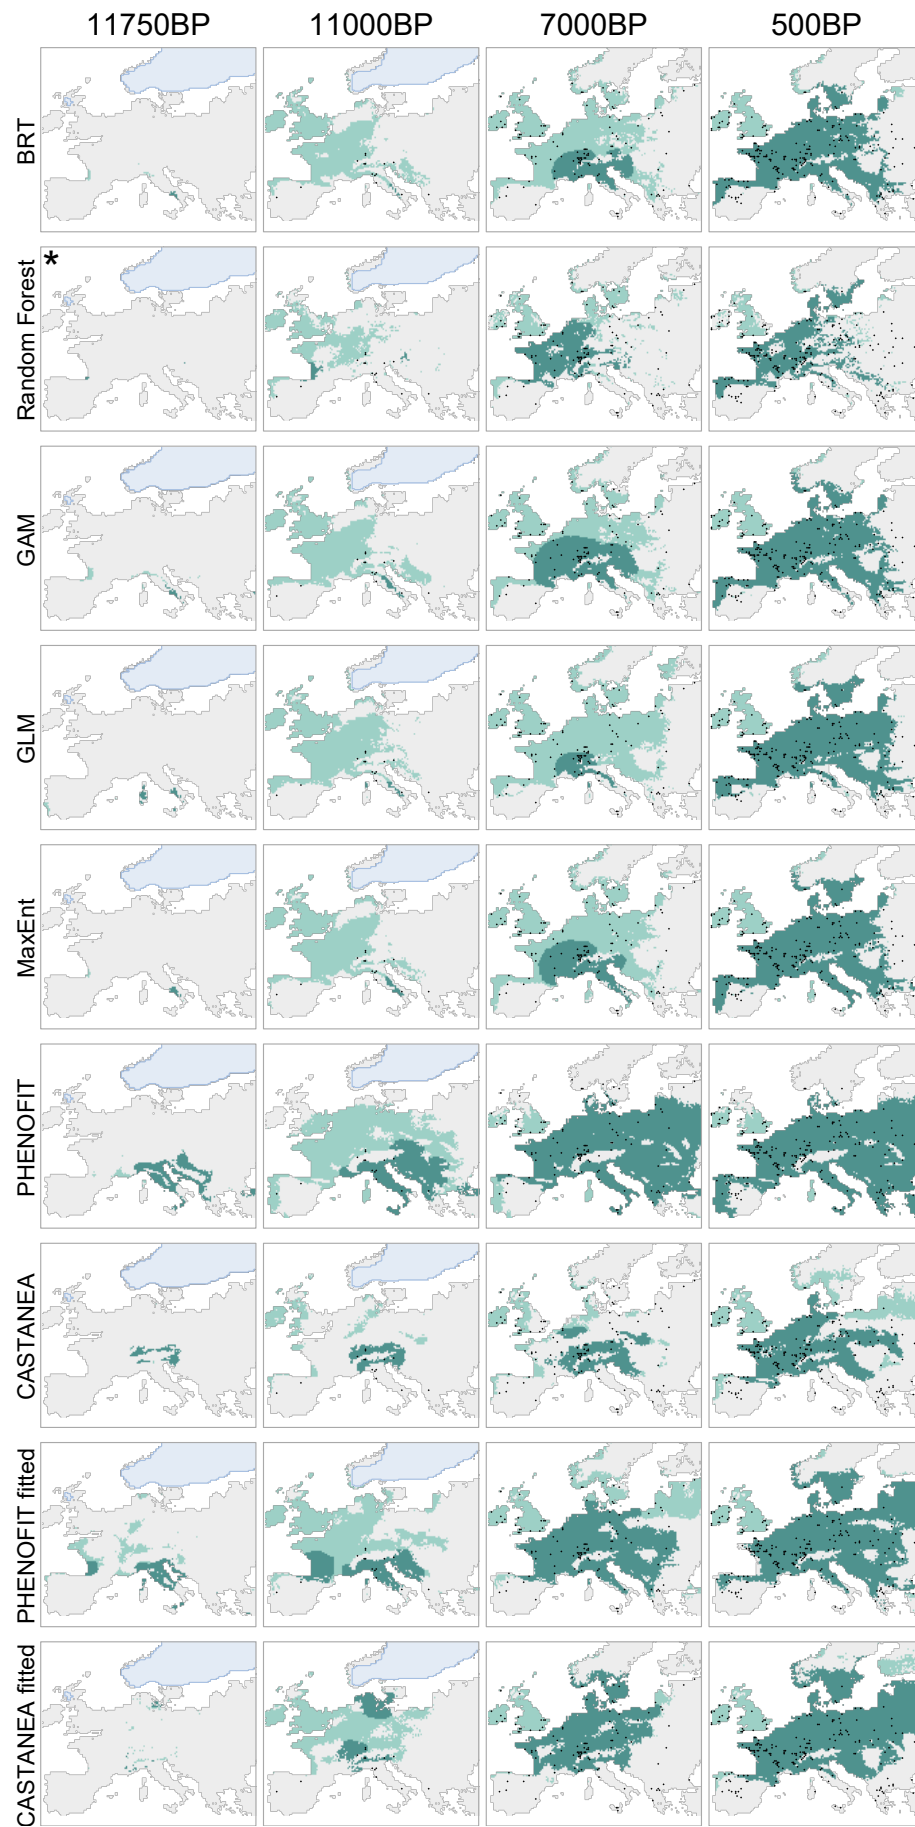

Figure 2: Example of paleosimulations obtained with the eight models used in this study for deciduous oaks.
